Dear Wendell:

Reference is made to our letter SP-1083 which requested that the cognizant auditor at the Boston facility perform an audit of the settlement proposals for completed Subcontract 100-9 and terminated Subcontract 100-18.

It is our understanding that such an audit has been made and certain elements which help to make up the overhead rate were questionable. Because of this we have not taken any further action towards closing out those subcontracts.

Through conversation with our Boston subcontractor we understand that a recent finding by the Boston Air Procurement District resolves at least a portion of this overhead problem. If this is so, may we again respectfully request the assistance of your office in obtaining for us a report of the cognizant auditor's findings and recommendations applicable to those settlement proposals.

Very truly yours,

Warren
